### Project Description

With the first phase now complete, Lewisham Gateway will see the delivery of Portrait Two – the striking 22 storey building comprising one, two and three bedroom apartments.

Progressive regeneration is already uniting elements of Lewisham Town Centre including Lewisham Shopping Centre, the High Street and Glass Mill Leisure Centre, to form a streamlined hub which is easy to navigate for pedestrians and cyclists as well as motorists. The result is the creation of a highly desirable living space, emphasising leisure and transport links whilst retaining and enhancing Lewisham’s strong community spirit.

### Key points

An attractive riverside park open to residents and visitors alike will provide green spaces and an area of tranquillity within the heart of the borough. Confluence Place will open up the rivers Quaggy and Ravensbourne, providing a natural gateway into Lewisham town centre.

## Features

- The chance to enjoy a residents rooftop terrace, whilst appreciating the current panoramic outlook across some of London's most famous landmarks
- Positioned a few moments away from Lewisham station/DLR, provides viable links into the center of London.

*\*Images showing views are based on the site at the time the image is produced. Please note that landscapes change and a view which is unrestricted now may be restricted in the future. We do not control adjoin or surrounding land.*
